Application Test Log

SWE 3409 Mobile Application Development

Student name	Arop Malual
Registration number	25/27389
Application name	AropPortfolio
Course	Mobile Application Development

Test Results

No.	Feature Tested	Expected Result	Actual Result	Status
1	Launch application	App opens without crashing	The app opened straight to the Home screen without crashing or freezing.	**Passed**
2	Home screen	Displays profile information and navigation buttons	Home showed my name sentence, headline, short biography, availability status, verification code and the button leading to my projects.	**Passed**
3	Navigation	User can navigate between screens	I moved between all bottom tabs and opened a project from the list. Going back returned me to the same screen I left.	**Passed**
4	Skills screen	Displays the student's skills and relevant information	The Skills screen listed my skills with their progress bars, and the education timeline appeared below them.	**Passed**
5	Projects screen	Displays available project information	The Projects screen showed my project cards with their titles, short summaries and technology tags.	**Passed**
6	Project details	Opens the correct details for the selected project	Tapping each project opened its own details page showing the problem, my contribution and the technologies used.	**Passed**
7	Profile editor	Allows the user to edit profile fields	I could change the headline, biography, primary skill and availability status. Invalid input showed a message under the field.	**Passed**
8	Save profile	Saves changes and displays updated information	After saving, a confirmation appeared and Home showed the new details. They were still there after closing and reopening the app.	**Passed**
9	Photo selection	Handles image selection and cancellation correctly, if implemented	I added a photo from the camera and the gallery and saw a preview. Cancelling left the old photo unchanged, and removing it brought back the initials avatar.	**Passed**
10	About/More screen	Opens the correct information screens	The About screen opened and showed the app name, my name, registration number, verification code, version and data-use statement.	**Passed**
11	Screen layout	Text and controls remain readable without overlapping	Text and buttons were readable on the screen, with nothing overlapping or cut off.	**Passed**

No.	Feature Tested	Expected Result	Actual Result	Status
12	APK installation	APK installs and launches outside Expo Go	The APK installed on the phone and launched on its own without Expo Go. The main features also worked in Airplane Mode.	**Passed**
